Streamlining Success: The Store Manager's Guide to Inventory Mastery

Introducing Store Manager: Your Ultimate Inventory Solution

Welcome to a new era of inventory management. Store Manager is designed to transform how you track, optimise, and control your stock, ensuring unparalleled efficiency and profitability. Say goodbye to manual errors and hello to intelligent inventory.

Real-time Stock Tracking: Granularity from Quarry to Customer

End-to-End Visibility

Track every item's journey from its raw material origin (quarry) through production, storage, and final delivery to the customer.

Instant Updates

Receive live updates on stock levels, movements, and locations, preventing discrepancies and improving decision-making speed.

Accurate Data

Leverage precise, real-time data to forecast demand, manage reorder points, and reduce the risk of overstocking or stockouts.

Seamless Supplier Integration & Purchase Order Management

Store Manager integrates directly with your suppliers, streamlining the entire purchase order process. Automate orders based on real-time inventory levels, ensuring you never run out of critical stock.

- Automated PO generation
- Supplier performance tracking
- Reduced administrative burden
- Improved lead time management

Lot and Batch Traceability: Ensuring Quality and Accountability

Detailed Tracking

Maintain detailed records of every lot and batch, from receipt to dispatch, including expiry dates and quality control data.

Rapid Recall Management

In the event of a recall, quickly identify and isolate affected products, minimising risk and protecting your brand reputation.
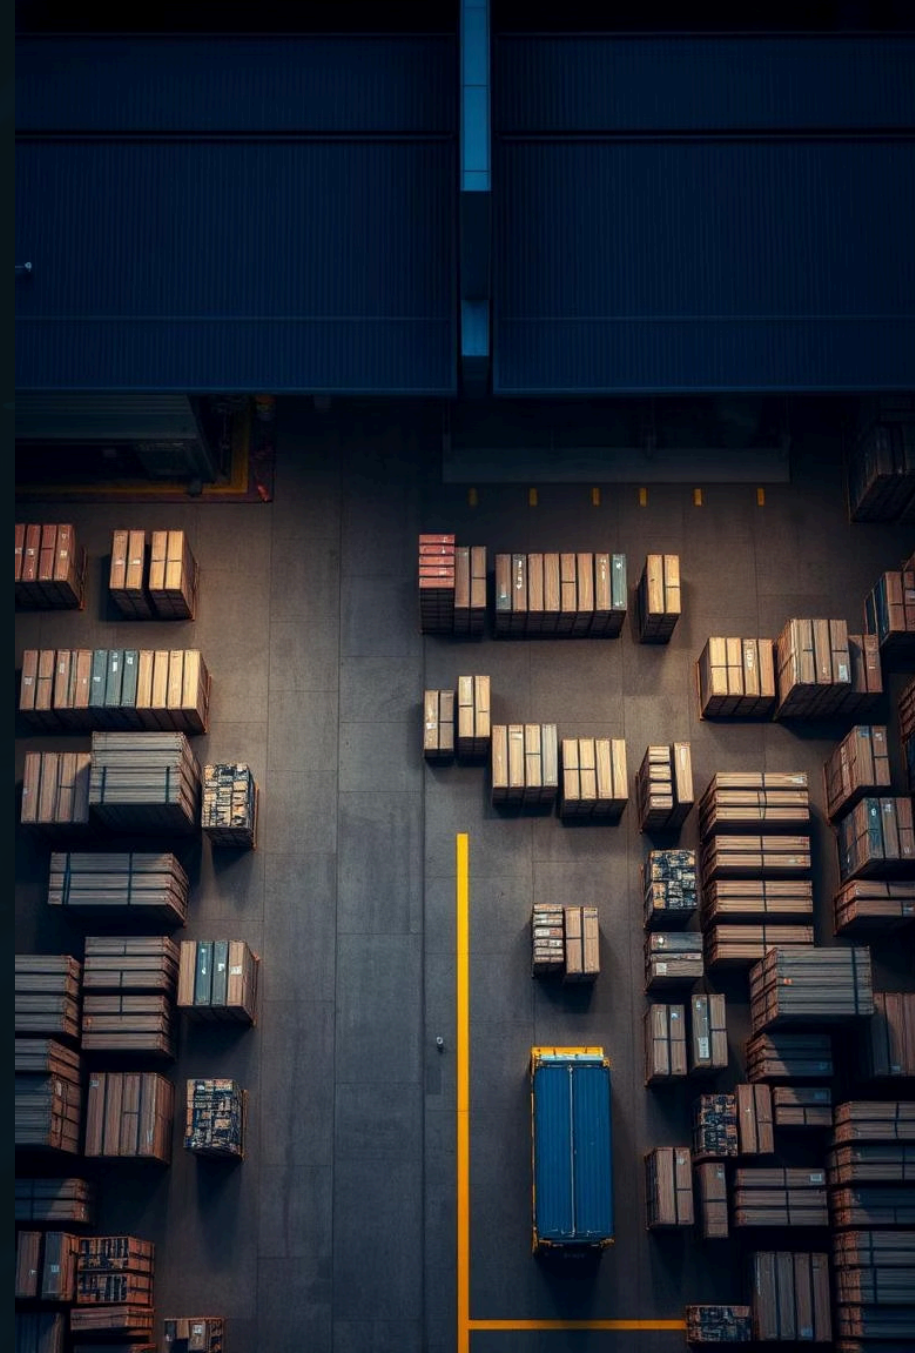

Enhanced Compliance

Meet stringent regulatory requirements with comprehensive traceability, providing an auditable trail for all inventory movements.

Smart Storage Optimisation: Maximising Yard Space

Store Manager uses advanced algorithms to suggest optimal storage locations, reducing retrieval times and maximising your existing yard and warehouse space. Cut down on wasted space and improve operational flow.

Key Benefits: Efficiency, Cost Savings, and Reduced Waste

30%
Increased Efficiency

Streamline operations and reduce manual workload through automation and real-time data access.

20%
Cost Savings

Minimise carrying costs, prevent stockouts, and reduce losses from expired or obsolete inventory.

15%
Reduced Waste

Improve inventory accuracy and turnover, leading to less spoilage and environmental impact.

These benefits translate directly into a healthier bottom line and a more sustainable business model.

Store Manager in Action: A Practical Use Case

Scenario: A construction materials supplier needs to manage vast quantities of fluctuating stock across multiple yards.

Challenge: Manual tracking leads to frequent errors, lost inventory, and delays in fulfilling customer orders.

Solution: Implementing Store Manager provides real-time visibility, automated batch tracking for cement and aggregates, and optimised yard layout suggestions.

Result: Orders are fulfilled 25% faster, inventory discrepancies are reduced by 90%, and overall operational costs drop significantly.
